

Vircon32

← -----

This memory card provides Vircon32 with a 1 MB Read & Write memory that allows the console to save information between game sessions. Not all games support saving to card, so please check every particular game.

1 MB = 1,024 KB = 1,048,576 Bytes. Card memory is only addressable in 32-Bit Words for a total of 256 KWords = 262,144 independent Words.

Insert card into the console's front slot marked as "MEMORY CARD" keeping the labeled side facing up

CAUTION: Use this card with Vircon32 systems only. Every memory card must only be used to store data for a single Vircon32 game or program at any given time. Note that using a memory card with previous data from a different program can result in corruption and/or incorrect behavior for the current program. Prevent this by deleting all previously stored data every time the memory card needs to be used with a new game or program.

For more information about the memory card or the console, check the Vircon32 website at <https://www.vircon32.com>.

This product has been tested by the Vircon32 community to guarantee it can provide a reliable gaming experience.
