GAME SUITABLE FOR ALL AGES

BASIC
PLATFORMER

Yeah, it's basic. But, basic does not mean easy!
If you want to beat this game, you will have to
master every obstacle and their combinations.
When you learn everything, you will have to do it
fast since you go against the timer too!
This game has been designed with only a few
elements on purpose. Its 3 worlds with 10 levels
each will progressively introduce you to new
elements and more complex mechanics.
In addition to making the game interesting to
play, effort has also been placed on making the
source code clean and with a clear structure so
that it can be taken as an example.
This game is free and open source!
Get the game binaries and source code online.
