GAME SUITABLE FOR ALL AGES

CONTAINS ONLY INSTRUCTIONS IN ENGLISH

Vircon32 Seal of Quality

This game is free and open source! Get the game binaries and source code online.

Let's see what you can do....

If you get good enough you may even go further beyond 2048 and try to reach greater numbers.

This new version features improved graphics and music. Compared to the original, it feels like an arcade version of 2048! You can also know your times if you are into speedrunning.

2048 is an accessible puzzle game: move the board to make matching tiles merge into greater numbers. Try to keep it up and reach 2048 while new tiles keep being added!

The classic is back, in a remastered version.

V32

MADE BY CARRA

2048

Simple but engaging! What will be the highest number you can reach?

8192 2 32 16 512 1024 4
